

## Genpact Interview Experience

There was a Walking and I went, they conducted three rounds over there which were

1)PIR (Personal Interaction Round) ie they give us a topic n we have to speak on that topic for few mins, which was easy basically they were testing our communication skills.

2)Written Test which includes few English passages, grammar, analytical and logical questions which can be done .

3)Interview:

They called me to come to their main office.The interview was scheduled at 11 but my turn came at 12:30 pm .The interviewer(I) was very cool,he took me(M) inside his cabin,it was in this way:

Then he asked few qn's from c++,java, OS,RDBMS.Asked to write few queries which were a bit typical but done successfully.

The interview was all around 45 mins. At last gave me shake hand, I just went outside and again returned back and asked him "Sir! Shall I leave!". He said, give me 10 mins. I waited for half an hr.

Later a lady called me and took for a HR round. She took me into her cabin and left said that she will be back in few mins, came after few mins.

HR: Introduced herself and asked me to explain about myself in detail.

Me: explained.

HR: what were you doing from this one year.

HR: Your strengths.

HR: she explained everything.

Finally she gave a firm shake hand and said thank you, me also done the same thing. Went outside again knocked the door and asked mam when can I expect the feed back.

She said, "give us 2 days".

I left, and one fine afternoon I received mail from them offering for a position in their organization. I was really thrilled, not getting words to describe the moment.

At last I made it!

Thanks for everyone who supported me thru out my career.
