

AIG (American International Group) company has 4 rounds that you have to face as:

- 1. Aptitude**
- 2. GD**
- 3. Tech. Interview**
- 4. HR Interview**

All first 3 are the elimination rounds and final interview is just a formality.

AIG written test

Time Limit: 1 hour

No of questions-60

AIG aptitude test

1. Aptitude had three sections

a) Quantitative aptitude-30 questions

Probability, time and distance, volume, average etc.... Refer RS Agarwal's book

b) Reasoning as usual normal reasoning topics number series, coding and decoding, etc...

c) English-sentence correction, fill in the blanks, antonyms, synonyms, etc -20 questions

AIG technical test-basic concepts C, C++ and output programmes-10 questions

2 AIG group discussion (GD)

All students divided into the batches of 10 students. They had the usual GD topics

Impact of movies on youth in India,

Metro Vs. Non-metro cities,

Hollywood Vs. Bollywood,

Mobile phones in college should be banned or not,

MNCs in India,

GD should be conducted or not, etc

3. Technical interview

Tech interview it is bit easy for the non CS and IT students as they only ask the concepts of C/C++ and any other subjects if you specify. For CS and IT they ask on JAVA, Linked List, SQL, DBMS, RDBMS, Data Structures etc.

If you are not specifying any subjects of interest then he will ask your core subjects so better specify some subject of your interest and at which you find yourself easy. Otherwise if he asks you the core subjects

Now the next round is then pray to God and ask for mercy.

4. If you are in final HR round

They asked simple and all the general HR questions.

These are all previous years selection process. Prepare well for the tests, Refer RS Agarwal book for quant and reasoning

Be confident in all sections and interviews concentrate your core subjects
