A total of 36 questions. 18 from series and 18 from aptitude. For each question you have a timer of 2.15 min. no need of tension frnds it is enough time to answer the question just be cool and answer it confidently. It is very easy just practice previous papers of IBM. You can easily crack it. For number series practice previous questions and for aptitude no need of all the topics. Just prepare the following topics.

After the completion of the test they asked us to assemble at a hall they announced the results in 15 min. I cleared it.

They conducted second round in a span of 10 min which is an English assessment.
